Library Mission Statement
and
Long Range Plan of Service

The mission of the North Babylon Public Library is to provide cost
effective library services to the members of the North Babylon
community. The Library exists to inform, educate and culturally enrich
the residents of all ages of the district through the selection,
organization, promotion and dissemination of information. The Library
will continue to improve and expand the collection of materials and
services available, and to continue to be responsive to the community's
needs. The Library has the opportunity to make a difference in the
community, the competence to do so, and the commitment.

The specific long-term objectives we will use to achieve our goals
include:

- Expansion of the library to include a ground level meeting room,
  elevator access to public areas and other A.D.A. issues, quiet study
  room, music room, additional offices and shelf space as anticipated
  for the next twenty to twenty-five years.
- Hire, retain, and continually train and re-train knowledgeable staff
  in each of the areas of specialty (children's, adult, technical,
  circulation and custodial services) to increase the level of service
  to the community.
- Explore new technologies, as they become available to determine
  appropriateness to the North Babylon Public Library.
- Insure programs and services are designed to be age appropriate.
- Enhance resources to assist patrons to make decisions that affect
  their lives.
- Insure the library is a safe and welcoming space.
- Create a public awareness campaign to insure a sustainable library.
- Maintain liaisons with libraries (local, regional and national),
  library associations, legislative representatives, civic
  associations, the school district, etc., to expand the overall
  health of the library.
- Expand Sunday service to include the month of September.
- Continue to enhance the Library's web site and newsletter.
